

RESUMate 11

Product Summary & Price List

Unmatched value for over 20 years.

Since 1988, users have praised RESUMate software for its clean, simple design. RESUMate products include all the features you'll ever need, without the clutter of "bells and whistles" that only get in the way. Learning to use RESUMate is so easy you'll start using the program the same day you purchase it.

Whether you're purchasing software for yourself or for your company, you'll want solid value for the money you spend. In the field of recruiting software, no products come close to RESUMate in providing so much value for so little cost.

BUY WITH CONFIDENCE — All RESUMate purchases are protected by an unconditional 30-day money back guarantee.

NO RECURRING FEES — All RESUMate prices include FREE training and technical support.

Lite versus Pro: which version of RESUMate is *right for you?*

First ask yourself this question: “What am I trying to accomplish with software, right now?”

look at all you can accomplish with **RESUMate Lite:**

RESUMate Lite performs a simple, high-value function: it converts text resumes into easy-to-search database records. Any organization that receives resumes via e-mail (or already has a store of resumes on a server or local hard drive) absolutely needs RESUMate Lite.

For a one-time price of just \$295, you can:

- * Automatically convert resumes into an easy-to-search database file.
- * Search your database in seconds, finding people by job titles, skills, geography, pay rates, etc.
- * Keep unlimited notes of phone conversations with candidates and hiring managers.
- * Automatically see a log of all e-mail correspondence with a candidate (requires Outlook).
- * Instantly generate a list of e-mail addresses to send bulk e-mail messages.
- * Instantly generate a list of recruiting calls, marketing calls, interviews, or any important dates.
- * Send information from your database to Outlook (Contacts, Appointments, Tasks) for viewing on your PDA.

accomplish a whole lot more with **RESUMate Pro:**

RESUMate Pro integrates the candidate records of the Lite version with records for clients, jobs, and hiring managers. RESUMate Pro is a true relational database, in which a few mouse clicks simultaneously update all related records in the database.

For a one-time price of just \$795, you can:

- * Click in an interview date, and all records in the database that “need to know” about this interview are updated simultaneously. (No more spreadsheets to keep track of open positions).
- * Build valuable historical records of all job and interview activity with candidates, clients, and hiring managers, completely automatically.
- * Instantly see a “life-to-date” list of all of the candidates who have ever been submitted to a client or hiring manager, plus a separate list of active candidates currently in the interview process.

here's the bottom line—when to buy **RESUMate Lite:**

If your real interest is getting control over the resumes that are already on your PC and that are arriving every day in your inbox, then the Lite version may be all you'll need.

The Lite version converts text resumes into complete, easy-to-search database records in less than 10 clicks and just a few seconds. Remember, there is absolutely no penalty if you start with the Lite version and then upgrade to the Professional version at a later date.

“I've got to tell you RESUMate is the best system I have ever used over the past 37 years.

Revere, PA

This is so much easier than the other database we paid so much money for, it's ridiculous.

Fort Worth, TX”

here's the bottom line—when to buy **RESUMate Pro:**

If your immediate goal is to manage all of the records that a recruiter needs to deal with on a daily basis, not just candidate records, but hiring manager, client, and job order records, then the Pro version is likely the better place to start.

The Pro version includes all of the features and functions of the Lite version. Plus the big payback of the Pro version is that a few clicks update several records simultaneously. Click in an interview date, and 5 records get updated at the same time: (1) the Candidate record; (2) the Client record; (3) the Job Order (or requisition) record; (4) the Hiring Manager record; (5) a comprehensive Daily Planner screen.

Check out these prices: you won't find better value *anywhere*.

Seeing is believing: **Take RESUMate for a test drive, or purchase a copy today.**
